

**COMPETENCIES  
EMPLOYEE SELF-ASSESSMENT**

**LOG 101 – ACQUISITION LOGISTICS FUNDAMENTALS**

<b>LOG 101</b>	<b>Competency</b>	<b>Yes</b>	<b>No</b>	<b>Work Description/Justification</b>
1	Identify the sources of operational requirements and the decision process that governs the acquisition of DoD systems and equipment.			
2	Apply the Integrated Product and Process Development (IPPD) process via the Integrated Product Teams (IPTs).			
3	Identify the systems engineering process as it relates to acquisition logistics within the IPPD environment.			
4	Identify DoD acquisition strategies as they relate to acquisition logistics.			
5	Identify changes underway in the sustainment logistics base and the impact on acquisition logistics.			
6	Identify life cycle cost concepts as they pertain to acquisition logistics.			
7	Identify the acquisition logistician's role in the contracting process throughout the life cycle.			
8	Identify the importance of supportability analyses as an integral part of the systems engineering process.			
9	Recognize a variety of environmental issues and identify a range of requirements and issues that foster understanding of implications on acquisition logistics.			

LOG 101	Competency	Yes	No	Work Description/Justification
10	Distinguish the key concepts of acquisition management that are unique to acquisition logistics.			
11	Identify how the maintenance planning process provides a basis for the establishment of supportability and support element design.			
12	Identify Depot Maintenance and Depot Maintenance Interservicing Processes and the impact on the establishment of a logistics support structure.			
13	Identify the concepts of developmental and operational testing and the logistics activities associated with the planning and conduct of a DoD weapon system test program.			
14	Identify the forms of contractor support and the role of the acquisition logistician.			
15	Identify the management concepts and decision processes which govern acquisition and support of computer resources.			
16	Identify supply support, source coding, and provisioning processes employed during the systems acquisition process.			
17	Predict issues associated with the packaging, handling, storage, and transportation (PHS&T) of systems and equipment.			
18	Identify the process involved in the identification, design, and construction of facilities.			

LOG 101	Competency	Yes	No	Work Description/Justification
19	Identify the purpose, policies, and procedures for the development of technical data in support of systems and equipment.			
20	Distinguish the difference between manpower and personnel requirements, policies, procedures, and documentation, and summarize the key elements of training in support of acquisition logistics.			
21	Identify the policies, procedures, and processes associated with the identification, development, acquisition, and support of support equipment.
